## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Sota (US5757080).

Sota discloses (see cover figure) a double-sided chip package comprising:

A LOC lead frame having a plurality of leads (2, and portion extending from 11 to 12 including outer leads outside encapsulate), each lead having a supporting portion (12, see that examiner refers to portion extending from above 11 to 12), an inner connection portion (where wires 3 are connected to the leads) and an outer connection portion (outside encapsulant 4), wherein the inner connecting portion is between the supporting portion and the outer connecting portion;

An upper chip 1c having a first upper surface, a first bottom surface and a plurality of bonding pads (inherently under wires 3) on the first upper surface, wherein the first bottom surface is attached on the supporting portions of the leads;

A bottom chip 1d having a second upper surface, a second bottom surface and a plurality of second bonding pads on the second bottom surface, wherein the second

Art Unit: 2827

upper surface is attached to and located beneath the supporting portions of the leads so that the supporting portions of the leads are sandwiched between the upper and bottom chip.

Sota also discloses:

- Tapes (1a, 7, 11) fixing the upper chip and the bottom chip to the supporting portions of the leads
- An epoxy (encapsulate 4) filling a space between the upper chip and the bottom chip
- Wherein the supporting portions and the inner connecting portions of the plurality of leads are formed on a common plane

Claims **7-10** are **also** rejected over Figures 9 and 13 of Sota. The correspondence of elements is evident and similar to the explanation above with respect to the cover Figure.

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's **arguments** with respect to the claims have been considered but **are moot** in view of the new grounds of rejection.

Art Unit: 2827

Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
